Acknowledgement

Receipt is acknowledged of the Amendment filed May 29, 2007.

Reasons for Allowance

Claims 1, 4, 5, 7, 9, 11, 13-15, 17-33, 35-37, 39-45, 64, and 65 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Fifield et al., taken alone or in combination of other references, does not teach or fairly suggest a method or a MOS driver circuit comprising, among other things, maintaining a controlled voltage at a first input terminal of said first MOS transistor, and using a signal adder circuit to provide a differential voltage at a second input terminal of said second MOS transistor (claims 1, 7, 20); using a signal adder circuit as part of said MOS driver circuit; maintaining a controlled voltage at a first input terminal of said first MOS transistor; using said signal adder circuit to provide a differential voltage at a second input terminal of said second MOS transistor (claim 26); and a signal adder circuit coupled to said first and said second MOS transistors, wherein a first output of said signal adder circuit is coupled to said second input terminal to provide said differential voltage to said second MOS transistor (claims 32, 37, 64, and 65), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
